Purchase functions and Procedure UNIT - III Lecture Hrs:12 Managing for Quality: Basic concepts of quality, dimensions of quality, Juran's quality trilogy, Deming's 14 principles, Quality improvement and cost reduction, ISO9000-2000 clauses & coverage. Six Sigma, Productivity-factors affecting productivity - measurement & improvements in productivity-new product development and design-stages. UNIT - IV Lecture Hrs:12	•								
 To facilitate the knowledge over real time inventory control techniques To offer learners an introduction to industry 4.0, its applications in the business world. Course Outcomes (CO): Student will be able to Understand the concept of Production and Operations Management. Construct and interpret simple control charts for both continuous and discrete data. Gain knowledge on the quality philosophies and principles of deming, Juran, six sigma andto become acquainted with the International Organization for Standardization's ISO 9000:2000 requirements. Learn different types of inventory that firm's use and their role in value analysis Familiarize with inventory concepts to support the development of useful quantitative models for inventory management. Understand the drivers and enablers of Industry 4.0 UNIT · I Lecture Hrs:08 Introduction and Overview of Operations Management: Definition of Operations Management – Nature and Scope of OM – Role & Decision areas of Operations Manager- interface of OM with other functions - Operations Management's future challenges UNIT · II Lecture Hrs:12 Operations Control: Managing of Work Environment–Automation—Technology Management-Waste Management-Quality Assurance and Quality Circles–Statistical Quality Control–Control Charts for Variables-Average-Range and Control charts for Attributes. Acceptance Sampling Plans. Purchase functions and Procedure UNIT - III Lecture Hrs:12 Managing for Quality: Basic concepts of quality, dimensions of quality, Juran's quality trilogy, Deming's 14 principles, Quality improvement and cost reduction, ISO9000-2000 clauses & coverage. Six Sigma, Productivity–factors affecting productivity - measurement & improvements in productivity-new product development and design-stages. UNIT - IV 			8-						
 To offer learners an introduction to industry 4.0, its applications in the business world. DATA ANALYTICS LAB 0 1 2 2 Semester II Course Objectives: • To explain the procedure in creation of company, ledger accounts and to explore, present financial statements of an business organization • To demonstrate the process of storing, retrieving the data relating to employees, dealers, customers and consumers in an effective and efficient way • To impart the knowledge on Systems and MIS and process of designing the MIS in an organization. Course Outcomes (CO): Student will be able to • Demonstrate the creation of company, ledger accounts, explore and export financial statements • Exhibit the calculation of cost of capital and discounting factor techniques in long term investment decision. • Store and retrieve the data relating to dealers, customers and consumers based on products, geographical criteria. • Present the data in the form of pivot tables, graphs and charts in effective and efficient way • Understand information system in the organization, design of MIS and also internet and the tools used in Internet. List of Experiments: Unit - 1 Introduction to Excel - Cells – name range – references – Creating and editing worksheets-Cell formatting-Creating and using formulas and functions-Use of Macros –Sorting and querying data-Working with graphs and charts – usage of Past special Unit - 3 <td< th=""><th>Course Code</th><th>Skill Oriented Course</th><th colspan="5">L T P</th></td<>	Course Code	Skill Oriented Course	L T P						
 Course Objectives: To explain the procedure in creation of company, ledger accounts and to explore, present financial statements of an business organization To give knowledge on using of various financial tools to take long term investment decision To demonstrate the process of storing, retrieving the data relating to employees, dealers, customers and consumers in an effective and efficient way To impart the knowledge on Systems and MIS and process of designing the MIS in an organization. Course Outcomes (CO): Student will be able to Demonstrate the creation of company, ledger accounts, explore and export financial statements Exhibit the calculation of cost of capital and discounting factor techniques in long term investment decision. Store and retrieve the data relating to dealers, customers and consumers based on products, geographical criteria. Present the data in the form of pivot tables, graphs and charts in effective and efficient way Construct and present employee salary administration in an organization in an informative manner. Understand information system in the organization, design of MIS and also internet and the tools used in Internet. List of Experiments: Unit - 1 Basis of Excel: Cells – name range – references – Creating and editing worksheets-Cell formating-Creating and using formulas and functions-Use of Macros –Sorting and querying dataWorking with graphs and charts – usage of Paste special Unit - 3 Basis of Excel: Managing Worksheets and workbooks - Cory and Move Worksheets - Hide, Unhide, Group and Ungroup Cells -Hide and Unhide Worksheets -Save and Save As <li< th=""><th></th><th>DATA ANALYTICS LAB</th><th>0</th><th>1</th><th>2</th><th>2</th></li<>		DATA ANALYTICS LAB	0	1	2	2
