Semester I I Course Objectives: I • To explain descriptive statistics and inferential statistics • • To introduce various measurements used to describe the data and inter the results of the data analysis. • To describe the concept of probability, theorems, and types of probability distributions of data. • To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to • Understand statistical techniques popularly used to describe the data in managerial decisic making. • Know the procedure involved in inferential statistics and appropriate tests for given data. • Learn the computational skill , interpretation of results of the data analysis. • Analyse and differentiate various types of data distribution and its probability distribution. UNIT • I Iccture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Media – Mode ; Measures of Dispersion: range, quartile deviation, coefficient of correlation. UNIT • II Iccture Hrs: 12 Correlation – Coefficient of correlation. Regression – Properties of regression coefficients.Rat Correlation. UNIT • III Iccture Hrs: 12 Probability – Meaning and definition of probability – Significance of probability in busine application – Theory of probability: Addition and multiplication – B	Course Code 21E00105	STATISTICS FOR MANAGERS	L 4	<u>Т</u> 0	P 0	<u>C</u> 4
To explain descriptive statistics and inferential statistics To introduce various measurements used to describe the data and inter the results of the data analysis. To describe the concept of probability, theorems, and types of probability distributions of data. To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to Understand statistical techniques popularly used to describe the data in managerial decisis making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT - I	21100100	Semester		-	-	
To explain descriptive statistics and inferential statistics To introduce various measurements used to describe the data and inter the results of the data analysis. To describe the concept of probability, theorems, and types of probability distributions of data. To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to Understand statistical techniques popularly used to describe the data in managerial decisis making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT - I						
To introduce various measurements used to describe the data and inter the results of the data analysis. To describe the concept of probability, theorems, and types of probability distributions of data. To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to Understand statistical techniques popularly used to describe the data in managerial decisic making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT -1 Lecture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Media – Mode ; Measures of Dispersion: range, quartile deviation, med deviation, standard deviation, coefficient of variation. UNIT - II Lecture Hrs: 12 Correlation & Regression : Introduction, Significance and types of correlation – Measures orrelation – Co-efficient of correlation, Regression analysis – Meaning and utility of regressia analysis – Comparison between correlation and regression analysis – Meaning and utility of regressia analysis – Comparison between correlation and multiplication – Binominal distribution– Poisse distribution – Normal distribution. UNIT - IV Lecture Hrs:12 Testing of Hypothesis - Hypothesis testing: One sample and Two sample tests for means of small samples (test, ANOVA Test : One-way and two way ANOVA. UNIT -V Lecture Hrs:08 Non-Parametric methods; Chi-square test : Test of Goodness of fit - test for Independence - Attributes; Sign test: One sample and paired samples data. Testbooks: Statistical Methods, Gupta S.P., S.Chand.Publications Statistics for Management, P.N.Arora, S.Arora, S.Chand Statistics for Management, Lerin, Pearson Company						
analysis. To describe the concept of probability, theorems, and types of probability distributions of data. To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to Understand statistical techniques popularly used to describe the data in managerial decisio making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT -1 Lecture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, mee deviation, standard deviation, coefficient of variation. UNIT -1 Lecture Hrs: 12 Correlation & Regression : Introduction, Significance and types of correlation – Measures / correlation - Co-efficient of correlation and regression analysis – Meaning and utility of regressia analysis – Comparison between correlation and regression – Properties of regression coefficients-Rai Correlation. UNIT -1 Lecture Hrs: 12 Testing of Hypothesis- Hypothesis testing: One sample and Two sample tests for means af proportions of large samples (<i>L</i> -test), One sample and Two sample tests for means as proportions of large samples (<i>L</i> -test), One sample and Two sample tests for Independence - Attributes; Sign test: One-way and two way ANOVA. UNIT -V Lecture Hrs: 08 Non-Parametric Methods: Importance of Non-Parametric method – difference between parametr and non-parametric methods; Chi-square test : Test of Goodness of fit - test for Independence - Attributes; Sign test: One-way and paired samples data. Extendeds: Sign test: One sample and paired samples data. Extendeds: Sign test: One sample and paired samples data. Extendeds: Sign test: Soft Management, Richard I Levin, David S.Rubin, Pearson, Statistics for Management, Lerin, Pearson Co						
To describe the concept of probability, theorems, and types of probability distributions of data. To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to Understand statistical techniques popularly used to describe the data in managerial decisic making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT - I		uce various measurements used to describe the data and inter the	results	s of	the d	ata
data. To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to • Understand statistical techniques popularly used to describe the data in managerial decisic making. • Know the procedure involved in inferential statistics and appropriate tests for given data. • Learn the computational skill , interpretation of results of the data analysis. • Analyse and differentiate various types of data distribution and its probability distribution. UNIT -1 Iccture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, meedeviation, standard deviation, coefficient of variation. UNIT -1 Iccture Hrs: 12 Correlation & Regression : Introduction, Significance and types of correlation – Measures - correlation – Co-efficient of correlation and regression analysis – Meaning and utility of regressia analysis – Comparison between correlation and regression – Properties of regression coefficients-Rat Correlation. UNIT -11 Iceture Hrs:12 Probability – Meaning and definition of probability – Significance of probability in busine application. Iceture Hrs:12 Testing of Hypothesis- Hypothesis testing: One sample and Two sample tests for means of small samples (test), ANOVA Test : One-way and two way ANOVA. Iceture Hrs:08 Non-Parametric Methods:	•					
To impart the computational, analytical and interpretation skills using the data Course Outcomes (CO): Student will be able to Understand statistical techniques popularly used to describe the data in managerial decisic making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT -1 Lecture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, mea deviation, standard deviation, coefficient of variation. Course Outcomes (CO): Student will be able to • Understand statistical techniques popularly used to describe the data in managerial decisic making. • Know the procedure involved in inferential statistics and appropriate tests for given data. • Learn the computational skill , interpretation of results of the data analysis. • Analyse and differentiate various types of data distribution and its probability distribution. UNIT • I Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, mea deviation, standard deviation, coefficient of variation. UNIT • II Lecture Hrs: 12 Correlation & Regression : Introduction, Significance and types of regression coefficients-Rar Correlation. UNIT • II Probability – Meaning and definition of probability – Significance of probability in busine application – Normal distribution. UNIT • II Probability – Meaning and definition of probability – Significance of probability in busine application – Normal distribution. UNIT • II Lecture Hrs: 12 Testing of Hypothesis testing: One sample and Two sample tests for means of small samples (test), ANOVA Test : One-way and two way ANOVA. UNIT • V Lecture Hrs: 08 <td></td> <td></td> <td></td> <td></td> <td></td> <td></td>						
 Understand statistical techniques popularly used to describe the data in managerial decisio making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT - I Lecture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, mer deviation, standard deviation, coefficient of variation. UNIT - II Lecture Hrs: 12 Correlation & Regression : Introduction, Significance and types of correlation – Measures - correlation – Co-efficient of correlation, Regression analysis – Meaning and utility of regressic analysis – Comparison between correlation and regression analysis – Meaning and utility of regression analysis – Comparison between correlation and regression – Properties of regression coefficients-Rat Correlation – Theory of probability: Addition and multiplication – Binominal distribution – Poisse distribution – Normal distribution. UNIT - IV Lecture Hrs: 12 Testing of Hypothesis- Hypothesis testing: One sample and Two sample tests for means of small samples (test), ANOVA Test : One-way and two way ANOVA. UNIT - V Lecture Hrs: 08 Non-Parametric Methods: Importance of Non-Parametric method – difference between parametric and non-parametric methods, Gupta S.P., S.Chand.Publications Statistics for Management, Richard I Levin, David S.Rubin, Pearson, Complete Business Statistics, A.Mira house publications Statistics for Management, Richard I Levin, David S.Rubin, Pearson, Complete Business Statistics, A.Mira N.As nouse pub	To impar	t the computational, analytical and interpretation skills using the da	ita			
 making. Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill , interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT - I Lecture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, meadeviation, standard deviation, coefficient of variation. UNIT - II Lecture Hrs: 12 Correlation & Regression : Introduction, Significance and types of correlation – Measures of correlation – Co-efficient of correlation. Regression analysis – Meaning and utility of regression analysis – Meaning and utility of regression analysis – Comparison between correlation and regression – Properties of regression coefficients-Rat Correlation. UNIT - III Lecture Hrs: 12 Probability – Meaning and definition of probability – Significance of probability in busine application – Theory of probability: Addition and multiplication – Binominal distribution– Poisso distribution – Normal distribution. UNIT - IV Lecture Hrs: 12 Testing of Hypothesis- Hypothesis testing: One sample and Two sample tests for means at proportions of large samples (z-test), One sample and Two sample tests for means of small samples (test), ANOVA Test : One-way and two way ANOVA. UNIT - V Lecture Hrs: 108 Non-Parametric Methods: Importance of Non-Parametric method – difference between parametr and non-parametric methods; Chi-square test : Test of Goodness of fit - test for Independence Attributes; Sign test: One sample and paired samples data. Textonols: Business Statistics, J.K.Sharma, Vikas house publications house Pvt Ltd Reference Books: Statistics for Management, Ri				• 1	1 .	•
 Know the procedure involved in inferential statistics and appropriate tests for given data. Learn the computational skill, interpretation of results of the data analysis. Analyse and differentiate various types of data distribution and its probability distribution. UNIT · I Lecture Hrs: 12 Introduction of statistics – Nature & Significance of Statistics to Business, , Measures of Centr Tendency: Mean – Median – Mode ; Measures of Dispersion: range, quartile deviation, mea deviation, standard deviation, coefficient of variation. UNIT · II Lecture Hrs: 12 Correlation & Regression : Introduction, Significance and types of correlation – Measures or correlation. Correlation & Co-efficient of correlation and regression analysis – Meaning and utility of regressic analysis – Comparison between correlation and regression – Properties of regression coefficients-Rat Correlation. UNIT · III Lecture Hrs: 12 Probability – Meaning and definition of probability – Significance of probability in busine application – Theory of probability: Addition and multiplication – Binominal distribution– Poised distribution – Normal distribution. UNIT · IV Lecture Hrs: 12 Testing of Hypothesis- Hypothesis testing: One sample and Two sample tests for means at proportions of large samples (z-test), One sample and Two sample tests for means at proportions of large sample and paired samples data. Textbooks: 1. Statistical Methods; Chi-square test : Test of Goodness of fit - test for Independence - Attributes; Sign test: One-sample and paired samples data. Textbooks: 1. Statistics for Management, Richard I Levin, David S.Rubin, Pearson, Complete Business Statistics, Amir D. Aezel, Jayavel, TMH, 3.
